• The remaining 2.5% of the total supply which have been allocated for airdrops, community rewards, marketing and partnerships has not been locked, as these tokens will be utilized before and immediately after the launch to drive active engagement, promote growth, and build strategic alliances.

> **General Note on Uneven Allocations:**

- Flexibility: Uneven distribution allows for tailored wallet sizes based on expected use or contributions.
- Transparency: All wallet addresses and their respective percentages are being publicly displayed and are trackable on the blockchain.

"For more details on vesting, lockups, and liquidity usage, please refer to the project whitepaper".
